

Electricity

It is possible to connect to 230V electricity in the blue areas designated for **caravans**. See the [blue markings](#).

Participants in tents who need electricity for medical treatment can also connect here.

This tent area is right next to one of the caravan areas.

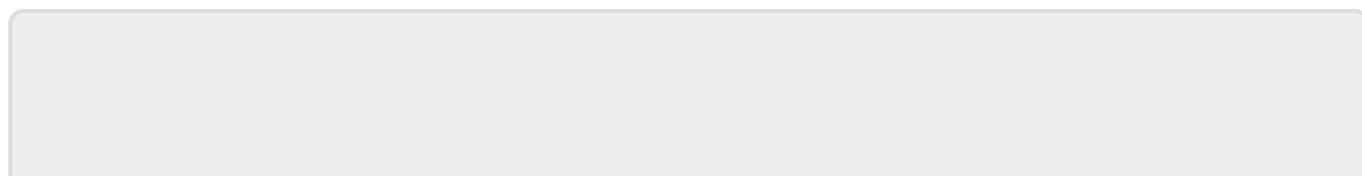

Bring your own extension and transition cable.

Routing cables across fire roads is not permitted.

The use of electric refrigerators in the tents is contrary to DNT guidelines and is not an option.

It is not permitted to use electric refrigerators in tents
